Projects starting this summer

Your Measure T dollars at work at Bubb Elementary School and Graham Middle School

Both Graham and Bubb

Security cameras

Security cameras in public areas will be installed at all school sites as a way to increase safety for students and staff members by deterring misconduct and preventing vandalism. Members of the schools' communities were engaged in a series of feedback meetings in Winter 2022.

Gates and locks

Last year, new fencing and gates were added in order to completely enclose campus and to match existing fencing. This summer, pending materials availability, a lock management system will be added to the gates. With the installation of the automatic locking/unlocking gates, the public will continue to have access to fields in the evenings and on weekends. The purpose of the perimeter controls is to secure campuses during school hours when students are present. Additionally, this winter, staff members will be able to access classrooms and offices using key cards, instead of keys.

Lighting

New lights and/or bollard style light posts will be installed to illuminate pedestrians' path of travel between campus and parking lots. The light locations were determined by photometric survey data. This additional lighting is an important safety measure for staff members and guests using the campus in the evenings and winter late afternoons.

Bubb only

Portables and Blacktop

The school's blacktop areas will be off-limits for 30 days. All brown portables installed during past construction will be removed.

Due to wear and tear exposing unsafe cracks, the existing blacktop playground will be resurfaced and striped. The asphalt between classroom wings will be resealed.

HVAC

Pending availability of materials, HVAC will be replaced in the Library this fall/winter. The existing HVAC system has already been updated to include MERV-13 filters, which is the highest-grade filter available for our units.
